New MD for SEA's Marine Division

Systems Engineering & Assessment Ltd (SEA) of Beckington Castle, Bath, announced that Kieron Gubb has been appointed as Divisional Managing Director. Kieron will take full profit and loss responsibility for the Marine Division, that designs and manufactures systems and products for the naval and shallow water survey markets.

Kieron joins from Thales Underwater Systems Ltd, where he was most recently the Director of the Outboard Technology Centre. He brings a wealth of experience to SEA, having worked in general management, business development and various project management roles over the past 20 years.

Kieron succeeds Phil Lock, who has taken retirement after overseeing a business transformation over the last four years, in which the Marine Division's turnover has more than doubled. Phil will remain associated with SEA, as a special advisor to the Board.
