

Launcher Systems

**Rapid-reaction
launch capability**

Torpedo Launchers

Providing rapid launch of a range of weapon types, available in multiple launcher configurations to suit differing platforms.

The SEA Lightweight Torpedo Launcher is easily configured and capable of deploying NATO compatible lightweight torpedoes.

Flexible in design, the Torpedo Launcher System meets the requirements of ships varying in size and structure.

The Torpedo Launcher is operated by a modern electronics assembly enabling standalone or integrated CMS solutions.

- Rapid-reaction launch capability
- Designed to store, handle, load, pre-set and discharge
- Low maintenance and proven long life
- Local and remote jettison facility
- Fully Environmentally tested
- Standalone or integrated as part of the CMS

Launcher Types

Torpedo Launcher

- Sole supplier of the lightweight Torpedo Launch System to the UK Royal Navy
- Lifetime support programme

Decoy Launcher

- Countermeasure agnostic
- Configured to customer requirement
- Capable of firing NATO standard 130mm decoys

Sonobuoy Launcher

- Scalable system with manual or automatic operational modes
- Tailorable to a range of different payloads
- Air launched
- No energetic requirement of stores

Launcher Selection Panel

- Designed, manufactured and installed by SEA
- Provides the human interface between the various launcher systems and the operator
- Available as 19" or VCS mountable units
